🎓 EDUCATION

The University of Texas at Austin

PhD, Mechanical Engineering ([Robotics Portfolio Program](#))

Aug 2021 - May 2025

Specialization: Controls, Autonomy and Robotics

Advisor: [Takashi Tanaka](#), [Luis Sentis](#), GPA: **4.0/4.0**

MS, Mechanical Engineering ([Robotics Portfolio Program](#))

Aug 2019 - May 2021

Advisor: [Takashi Tanaka](#), [Luis Sentis](#), GPA: **4.0/4.0**

College of Engineering Pune, India

BTech, Mechanical Engineering; GPA: **9.39/10** (Class Rank: **2/185**)

Aug 2013 - May 2017

🏢 PROFESSIONAL EXPERIENCE

Tensor Auto

San Jose, CA

Machine Learning Engineer for Motion & Behavior Planning

Jun 2025 - Present

- Working on integrating ML-based approaches with classical (rule-based) planning algorithms

Amazon Robotics

Seattle, WA

Applied Scientist II Intern (Vulcan Stow team)

May - Aug 2024

- Developed a real-time motion planning algorithm for Vulcan, an 8-DOF manipulator, enabling efficient item stowing and retrieval from densely packed shelves in the Amazon fulfillment centers

Cruise

San Francisco, CA

Motion Planning Intern

Sep - Dec 2023

- Worked on making the trajectories of autonomous vehicles safer and more comfortable during **remote assistance, auto parking and unparking**

Apptronik

Austin, TX

Software and Controls Intern

May - Aug 2020

- Developed a **sampling-based, real-time motion planning** algorithm Hierarchical Dynamic Roadmap (HDRM) for Apptronik's robotic manipulators
- Benchmarked the algorithm on **6 DOF manipulators** with the virtual workspace developed in **Gazebo**

📁 RECENT PROJECTS

PhD Thesis: Advancing Frontiers of Path Integral Theory for Stochastic Optimal Control

Advisor: Prof. Takashi Tanaka and Luis Sentis, UT Austin

May 2021 - May 2025

- Developed theoretical frameworks and algorithms to solve stochastic optimal control problems such as **risk-constrained motion planning** via the **path integral** control approach (an approach to synthesize optimal control policies **on-the-fly** using online Monte-Carlo simulations)
- Worked on analyzing the **sample complexity** of path integral to understand the interplay between the **achievable control performance** and sample size
- Developed digital twins (simulators) of physical systems like quadcopters using gray-box modeling techniques

Master's Thesis: Safety-based Motion Planning in Uncertain Environments

Advisor: Prof. Takashi Tanaka and Luis Sentis, UT Austin

Aug 2019 - May 2021

- Developed algorithms to estimate **end-to-end collision probabilities** of **motion plans** for autonomous agents with discrete and continuous-time dynamics, navigating in **uncertain environments**
- Incorporated the developed risk estimation framework in motion planners to generate **optimal safe trajectories** in the presence of uncertainties

Reinforcement Learning Based Risk-Bounded Motion Planning

Advisor: Prof. Peter Stone and Scott Nickum, UT Austin

Jan - May 2022

- Proposed an extension of **semi-gradient SARSA** and **TD(0)** algorithms to solve **risk-bounded motion planning** and end-to-end **risk estimation** problems for autonomous vehicles in continuous-space. The proposed model allows the user to adjust the **risk-averse level** of the autonomous agent.

Bachelor's Thesis: Design and Development of a Humanoid Torso

Advisor: Prof. Shantipal Ohol, College of Engineering Pune, India

Aug 2016 - May 2017

- Built a humanoid torso to **pick and place** objects by obtaining visual and audio data via **Microsoft Kinect**
- Designed **5 DOF robot arms** and **multi-finger adaptive grippers**, established a real-time control of the robot arms to attain the desired position and orientation of the end-effectors

+ SKILLS

Languages: Python, C++, **Tools and software packages:** MATLAB/Simulink, PyTorch, TensorFlow, ROS, OpenCV, NuSMV, Slugs, PRISM, LabVIEW, AutoCAD, SolidWorks, ANSYS, ParaView, MeshLab, Git, Isaac Sim

AWARDS, ACHIEVEMENTS AND POSITIONS

- **Reviewer:** TAC, CDC, ACC, ECC, IFAC WC
- **Best Student Paper Award**, Modeling, Estimation and Control Conference (MECC) 2025
- **CDC 2022 Student Travel Support Award**, IEEE Control System Society 2022
- **H. Grady Rylander Excellence in Teaching Fellowship**, UT Austin 2020
- **TCS Best Student Award**, College of Engineering Pune, India 2017
- **Best Bachelor's Project Award**, College of Engineering Pune, India 2017
- **S. N. Bose Fellowship** for a research internship in the USA (1 in 47 students across India) 2016
- **National Robocon:** Winner '17 [[video](#)], Runners-up '16 [[video](#)], Best Innovative Design '15 [[video](#)]
